

How to transfer files into Tango Core Model?

February 2017

Agenda

This document aims at describing each step to transfer files into Tango Core Model.

The new solution replaces FTP transfer

Step 1/6 : Connect to Citrix

Connect to <https://citrix.transdev.net/>

Sécurisé | <https://citrix.transdev.net/Citrix/XenApp/auth/login.aspx>

Vos bureaux et applications Windows à la demande, à partir de n'importe quel PC, Mac, smartphone ou tablet PC.

Step 2/6 : Open Citrix Server Explorer

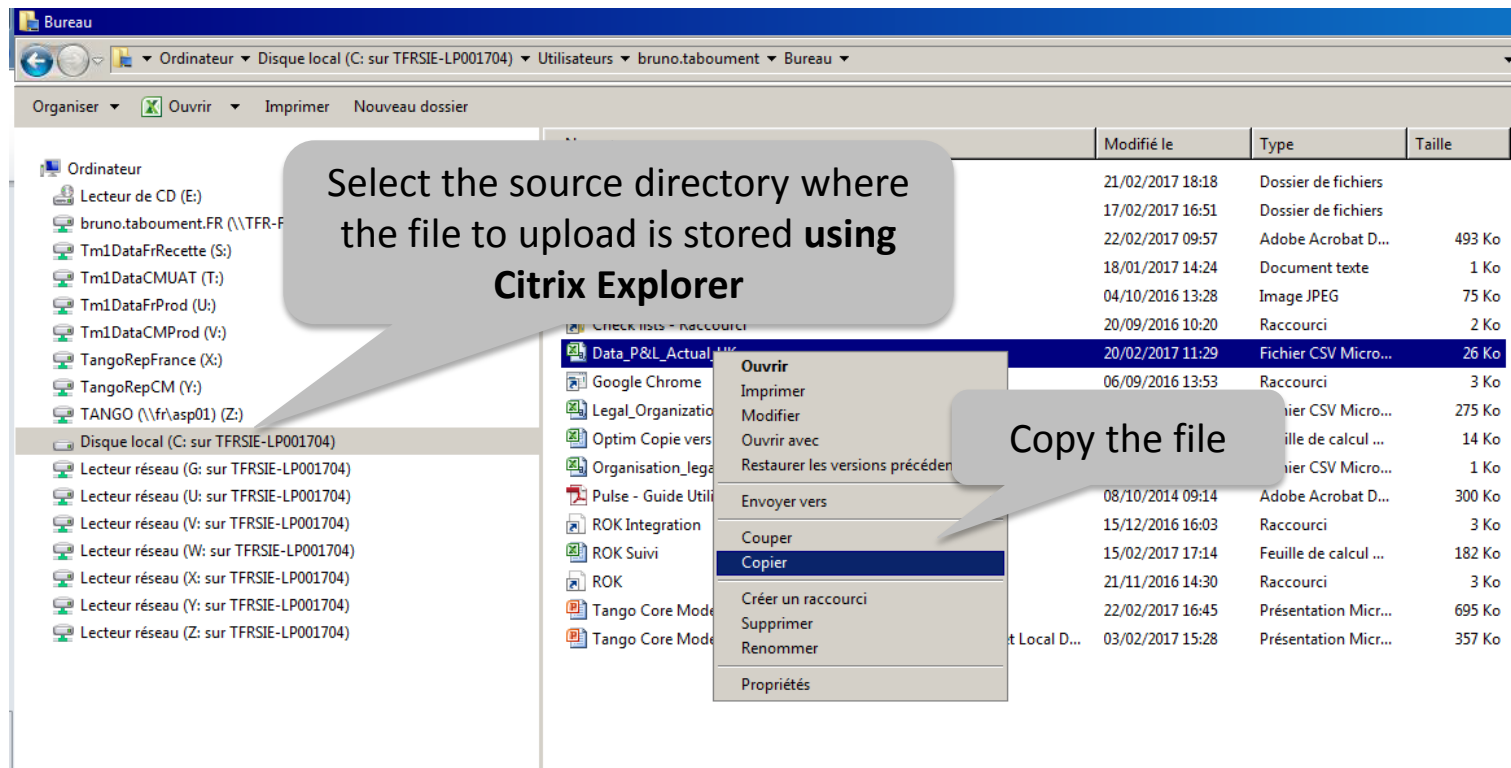

NB : Tango directory may not be the only icon into your Citrix Portal

Step 3/6 : Open Citrix Server Explorer

The screenshot shows the Citrix Server Explorer interface. The left pane displays a tree of network drives, with 'TANGO (\\fr\asp01)' selected and highlighted by a red box. A callout points to this selection with the text 'Target directory'. Below it, a group of network drives (G: through Z:) is also highlighted with a red box, with a callout stating 'Your network drives and your computer's directories'. The right pane shows the contents of the selected directory, which includes two folders: 'core_model_prod' and 'core_model_uat'. A callout points to these folders with the text 'Target directory for **Production and UAT (tests)** environnement where the users will upload the files'. A table below the folder list provides details for each folder.

Nom	Modifié le	Type	Taille
core_model_prod	08/02/2017 14:42	Dossier de fichiers	
core_model_uat	14/02/2017 15:30	Dossier de fichiers	

Step 4/6 : Select the source files

Copy and paste a file from another Windows Explorer will not work.

Step 4/6 : Select the source files

The image shows a Windows Explorer window titled 'core_model_prod' with the address bar set to 'TANGO (\\fr\asp01) (Z:)'. The left sidebar shows a list of drives and network locations, with 'TANGO (\\fr\asp01) (Z:)' selected. A red triangle with an exclamation mark is placed over the left sidebar. A text box with a red border contains the message: 'Copy and paste a file from another Windows Explorer will not work. You need to select the source files using the Citrix explorer'. A red arrow points from this text box to a second Windows Explorer window. This second window is titled 'Bibliothèques' and shows the 'Documents' library for 'Tango'. It displays a file named 'Data_P&L_Actual_UK' with a red 'X' over it, indicating that copying or pasting is not allowed. The file details at the bottom show it is a 'Fichier CSV Microsoft Excel' of 25,2 Ko, modified on 20/02/2017 at 11:29, and created on 23/02/2017 at 14:08.
